Preface to the Second Edition    xxi

---

## Chapter 1 Codes and Standards

1.1

General / 1.1  
American Gas Association (AGA) / 1.2  
American National Standards Institute (ANSI) / 1.2  
American Petroleum Institute (API) / 1.2  
American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE) / 1.2  
American Society of Plumbing Engineers (ASPE) / 1.3  
American Society of Testing and Materials (ASTM) / 1.3  
American Society of Mechanical Engineers (ASME) / 1.3  
American Society of Sanitary Engineers (ASSE) / 1.3  
American Water Works Association (AWWA) / 1.4  
American Welding Society (AWS) / 1.4  
Compressed Gas Association (CGA) / 1.4  
Current Good Manufacturing Practice (cGMP) / 1.4  
Code of Federal Regulations (CFR) / 1.5  
Environmental Protection Agency (EPA) / 1.5  
Food and Drug Administration (FDA) / 1.5  
ISO 9000 / 1.5  
Occupational Safety and Health Administration (OSHA) / 1.6  
Model Regional Building Codes / 1.6  
Manufacturers Standardization of the Valve and Fittings Industry (MSS) / 1.7  
National Electrical Manufacturers Association (NEMA) / 1.7  
National Fire Protection Association (NFPA) / 1.7  
National Institutes of Health (NIH) / 1.7  
National Oceanic and Atmospheric Administration (NOAA) / 1.8  
Nuclear Regulatory Commission (NRC) / 1.8  
National Sanitation Foundation, International (NSF) / 1.8  
Underwriters Laboratories (UL) / 1.8  
3-A Standards / 1.9

---

## Chapter 2 Piping

2.1

Code Acceptance / 2.2  
Pressure and Temperature Ratings / 2.2  
Cost / 2.3  
Corrosion Resistance / 2.3  
Physical Strength / 2.5  
Fire Resistance / 2.5  
Availability / 2.5  
Aluminum (Al) / 2.6

Brass (BR) /	2.6
Cast Iron Soil Pipe (CI) /	2.7
Acid-Resistant Cast Iron (AR) /	2.7
Carbon Steel (ST) /	2.7
Copper /	2.8
Ductile Iron Pipe (DI) /	2.9
Lead (LD) /	2.9
Stainless Steel (SS) /	2.10
Corrugated Steel Pipe /	2.12
Other Metallic Piping Materials /	2.13
Key Properties of Plastic Pipe /	2.15
Description and Classification /	2.16
Plastic Pipe Standards and Nomenclature /	2.17
Elements for Selection /	2.19
Plastic Pipe Materials /	2.24
Asbestos Cement Pipe (ACP) /	2.28
Glass (GL) /	2.28
Vitrified Clay (VC) /	2.28
Concrete Pipe /	2.29
Code Considerations /	2.30
Fitting Types /	2.30
Fitting Materials /	2.30
Metallic Pipe Joints /	2.34
Welding /	2.40
Flanged /	2.43
Hinged Clamp /	2.44
Adapters /	2.47
Joints for Plastic Piping /	2.47
Joints for FRP Piping /	2.49
General /	2.54
Codes and Standards /	2.54
Valve Components /	2.54
Valve Body Materials /	2.55
Valve Actuators /	2.56
Operating and Torque Considerations /	2.60
Firesafe Valves /	2.61
Valve Ratings /	2.62
Pressure Loss through Valves /	2.62
Valve Selection Considerations /	2.63
Gate Valves /	2.64
Globe Valves /	2.67
Plug Valves /	2.69
Ball Valves /	2.72
Butterfly Valves /	2.73
Diaphragm Valves /	2.73
Pinch Valves /	2.74
Check Valves /	2.74
Miscellaneous Valve Types /	2.75
General /	2.81
Codes and Standards /	2.81
System Components /	2.81
References /	2.93

## **Chapter 3 Solid-Liquid Separation and Interceptors**

**3.1**

General /	3.2
Filter Categories and Definitions /	3.3

Filter Ratings /	3.3
Membrane Filter Testing /	3.5
General /	3.7
Types of Strainers /	3.8
Materials of Construction /	3.8
Design Considerations and Selection Criteria /	3.11
Filter Classifications /	3.14
Types of Filters /	3.14
Deep Bed Granular (Sand) Filtration /	3.14
Activated Carbon Filters /	3.18
Cartridge Depth Filters /	3.19
General /	3.23
Code Considerations /	3.23
Design Considerations /	3.23
Structural Considerations /	3.23
Location /	3.24
Specific Substances /	3.24
References /	3.34

## **Chapter 4 Water Treatment and Purification**

**4.1**

Codes and Standards /	4.1
Suspended Matter (Particulates) /	4.5
Dissolved Minerals and Organic Substances /	4.6
Dissolved Gases /	4.7
General /	4.9
Deposits /	4.14
Corrosion /	4.15
General /	4.16
pH /	4.16
Langelier Saturation Index (LSI) /	4.16
Ryznar Stability Index (RI) /	4.18
Aggressiveness Index (AI) /	4.18
Aeration /	4.20
Clarification /	4.21
Deaeration /	4.22
Decarbonation /	4.22
Dealkalizing /	4.22
Distillation /	4.23
Filtration /	4.27
Ion Exchange and Removal /	4.27
Membrane Filtration and Separation /	4.36
Microbial Control /	4.40
Utility Water Treatment /	4.44
Boiler Feedwater Conditioning /	4.45
Cooling Water Conditioning /	4.46
Potable Water Treatment /	4.47
Codes and Standards /	4.51
Laboratory Systems /	4.51
Pharmaceutical Water /	4.53
Purified Water Types /	4.53
Pharmaceutical Water Treatment Process /	4.55
Feedwater /	4.57
Purification System Design /	4.57
Central Purification Equipment /	4.59
References /	4.62

**Chapter 5 Heat Transfer, Insulation, and Freeze Protection****5.1**

---

Codes and Standards /	5.1
Basics /	5.2
Types of Insulation /	5.7
Jackets /	5.9
Coatings, Adhesives, and Sealants /	5.13
Insulation Material and Thickness Selection /	5.14
Calculation of Insulation Thickness /	5.19
Freezing of Water /	5.24
The Mechanics of the Freezing Process /	5.24
Pipe Damage Due to Freezing /	5.25
The Freezing of Water in Atmospheric Vessels /	5.27
Sewer and Water Supply Piping Design /	5.30
Frost Closure of Vents /	5.35
Derivation of the Basic Formula for Frost Depth /	5.36
Electric Heat Tracing /	5.50
Steam Tracing /	5.56
Acknowledgments /	5.69
References /	5.69

**Chapter 6 Site Utility Systems****6.1**

---

Hydrologic Cycle /	6.2
Aquifers /	6.4
Inflow into Excavations /	6.5
Preliminary Investigations /	6.10
Storm Water Inlet Selection /	6.11
System Design Criteria /	6.21
System Design Procedure /	6.29
System Design Considerations /	6.33
Roof Retention /	6.35
Site Retention Methods /	6.35
General /	6.53
Codes and Standards /	6.53
Pipe and Installation Classifications /	6.53
Loads Acting on a Pipe /	6.54
Superimposed Loads /	6.57
Bedding /	6.67
Strength of Pipe Materials /	6.69
Total Load on Buried Pipe /	6.74
Cleaning Methods /	6.78
Repair of Cracks and Joint Separations in Piping /	6.79
Repair of Manholes /	6.80
Preventive Maintenance /	6.80
Sewer Components /	6.81
Manholes /	6.81
Sizing the Sanitary Sewer /	6.84
Sanitary Sewer Design Considerations /	6.96
Codes and Standards /	6.100
System Components /	6.100
Component Design and Selection /	6.102
System Design Considerations /	6.104
Storm Water Disposal /	6.106
Water Supplied from a Public Utility /	6.112

Water Supplied from Wells /	6.131
Water Supplied from Surface Water Sources /	6.142
Domestic Water Service /	6.143
Fire Protection Water Service /	6.150
Codes and Standards /	6.153
Drilling Methods /	6.153
Casing /	6.153
Grout /	6.153
Intakes /	6.154
Well Development /	6.154
Finishing the Monitor Well /	6.155
References /	6.155

## **Chapter 7 Turf Irrigation Systems**

**7.1**

General /	7.1
System Components /	7.1
Codes and Standards /	7.2
General Design Considerations /	7.2
The Soil /	7.2
System Design /	7.5
Acknowledgments /	7.12

## **Chapter 8 Cryogenic Storage Systems**

**8.1**

System Components /	8.1
Codes and Standards /	8.1
Bulk Storage /	8.2
Sizing the Large Bulk Tank /	8.4
Sizing the Vaporizer /	8.8
Pressure from Liquid Gases /	8.9
Pressure Relief Valves /	8.10
Pipe Materials and Insulation /	8.11
Pipe Sizing Methods /	8.12
System Design Considerations /	8.13
References /	8.13

## **Chapter 9 Plumbing Systems**

**9.1**

General /	9.1
Codes and Standards /	9.2
Fixture Units /	9.3
Plumbing Fixtures /	9.3
Equivalent Length of Piping /	9.3
Velocity of Water /	9.6
System Description /	9.7
Major System Components /	9.7
Sanitary System Design /	9.11
Suds Pressure Areas /	9.14
Sump Pumps and Sewage Ejectors /	9.15
House Sewer Design /	9.20
Introduction /	9.21

Codes and Standards /	9.21
Septic System /	9.21
Collection and Treatment Alternatives /	9.33
Solvent Plumbing System /	9.34
System Description /	9.35
Nomenclature /	9.35
System Design /	9.35
Circuit and Loop Vents /	9.38
Wet Vents /	9.39
Suds Relief Vents /	9.39
Sump and Ejector Vents /	9.39
Vent Headers /	9.40
System Description /	9.42
General System Criteria /	9.42
Roof Drainage Systems /	9.42
System Description /	9.55
Water Treatment /	9.55
Water Meters /	9.55
Contamination Prevention /	9.56
Water Velocity /	9.59
Water Distribution Systems /	9.60
Estimating Water Demand /	9.60
Design of the Water Supply Distribution System /	9.62
Adjusting Water Pressure /	9.64
Pipe Size Selection /	9.75
System Description /	9.76
Codes and Standards /	9.76
Water Heating Methods and Equipment /	9.76
Acceptable Hot Water Temperatures /	9.78
Water Heater Sizing /	9.79
Safety and Protective Devices /	9.88
System Design Considerations /	9.89
Hot Water Temperature Maintenance /	9.90
Circulating Water System /	9.94
Electric Heating Cable /	9.102

## **Chapter 10 Special Waste Drainage Systems**

**10.1**

Codes and Standards /	10.1
System Approval Requirements /	10.2
Pipe Material and Joint Selection Considerations /	10.3
Pipe Sizing Considerations /	10.3
pH Definition /	10.4
General System Design Considerations /	10.4
General /	10.7
Selection of Laboratory Waste Piping and Joint Material /	10.10
System Design Considerations /	10.10
Acid Waste Treatment /	10.10
General /	10.12
The Nature of Radiation /	10.12
Radiation Measurement /	10.13
Units of Radiation Dose /	10.14
Allowable Radiation Levels /	10.14
Shielding /	10.15
Radioactive Materials /	10.16
System Design Criteria /	10.16

General Design Criteria /	10.17
Pipe Material Selection /	10.17
General Design Considerations /	10.18
Decontamination /	10.19
Codes and Standards /	10.21
Biological Safety Levels /	10.22
Liquid Waste Decontamination System /	10.23
System Design Considerations /	10.24
General /	10.25
Codes and Standards /	10.25
Pipe Material and Joint Selection /	10.25
System Design Considerations /	10.25
System Description /	10.27
References /	10.27
Oil in Water /	10.28
Methods of Separation and Treatment /	10.28
Gravity Separators /	10.29
Flotation Devices /	10.29
Centrifugal Separators /	10.29
Filtration /	10.29
Smaller Systems /	10.30
Additional References /	10.30

## **Chapter 11 Facility Steam and Condensate Systems**

**11.1**

Systems Description /	11.1
Codes and Standards /	11.1
Steam /	11.2
Boiler Feedwater /	11.2
Steam Temperature /	11.2
Steam Quality /	11.2
Heat /	11.3
Specific Volume /	11.7
System Classifications /	11.7
Steam System Venting /	11.8
Steam Supply Systems /	11.9
Condensate Return Systems /	11.11
General /	11.13
Component Description /	11.13
Steam System Component Sizing /	11.28
Boiler Feed Pumps /	11.31
Condensate Recovery System Description /	11.33
Component Description /	11.34
Component Selection and Sizing Criteria /	11.36
Steam Trap Selection and Sizing /	11.39
Project Design Examples /	11.44
System Design Considerations /	11.49
Acknowledgments /	11.53
References /	11.53

## **Chapter 12 Liquid Fuel Storage and Dispensing Systems**

**12.1**

Definitions and Liquid Fuel Classifications /	12.1
Codes and Standards /	12.2
System Description /	12.5

System Components /	12.6
Storage Tanks /	12.7
Leak Detection and System Monitoring /	12.17
Vapor Recovery Systems /	12.23
Product Dispensing Systems /	12.25
Storage Tanks /	12.29
Atmospheric Tank Venting /	12.32
Leak Detection and System Monitoring /	12.32
System Monitoring /	12.33
Vapor Recovery /	12.33
Product Dispensing Systems /	12.33
Tank Protection /	12.34
Fire Pump Fuel Storage /	12.37
Emergency Generator Fuel Storage /	12.38
Piping Materials /	12.41
Pipe Sizing /	12.42
Submersible Pump Sizing /	12.44
General Design Considerations /	12.46
Tests /	12.46
Evaluation of AST or UST Installation /	12.47
AST /	12.48
UST /	12.48
System Design Considerations /	12.49
References /	12.51

## **Chapter 13 Fuel Gas Systems**

**13.1**

Fuel Gas Description /	13.1
Codes and Standards /	13.1
System Operating Pressures /	13.3
General /	13.5
Major Natural Gas System Components /	13.6
Site Distribution /	13.9
Site Service Sizing Procedure /	13.11
NG Site Service Pipe Sizing Methods /	13.14
Pipe and System Materials for Site Installation /	13.14
Interior Pipe Sizing Procedure /	13.18
Storage Tanks /	13.28
Maximum Content of Liquid in Tanks /	13.31
Location of Equipment on the Site /	13.31
Tank Foundations and Support /	13.31
Regulators /	13.33
Pressure Relief Devices /	13.33
Excess Flow Valve /	13.35
Service Line Valves /	13.35
Filler Valves /	13.36
Vapor Equalizing Valves /	13.36
Liquid Level Gauges /	13.36
Miscellaneous Equipment /	13.36
Vaporizer /	13.37
Propane Mixers /	13.37
LPG System Design /	13.39
Piping Materials /	13.47
System Description /	13.48
Codes and Standards /	13.48
System Components /	13.48

System Design Considerations / 13.50  
References / 13.51

## **Chapter 14 Compressed Gas Systems**

**14.1**

General / 14.2  
Definitions and Pressure Measurements / 14.2  
Physical Properties of Air / 14.4  
Water Vapor in Air / 14.5  
Impurities and Contamination / 14.8  
System Components / 14.12  
System Design / 14.33  
Project Design Example / 14.56  
General / 14.62  
Codes and Standards / 14.62  
Air Quality Standards / 14.62  
Air Pressure Requirements / 14.63  
Generation of Instrument Air / 14.63  
Pipe and Fittings / 14.63  
General / 14.64  
Codes and Standards / 14.64  
Classification of Specialty Gases / 14.65  
Grades of Specialty Gases / 14.65  
Storage and Generation of Gases / 14.68  
Distribution System Components / 14.71  
Distribution Network / 14.80  
General / 14.98  
Codes and Standards / 14.98  
Description and General Uses for the Common Gases / 14.99  
Storage and Generation of Gases / 14.100  
The Surgical-Medical Air Compressor Assembly / 14.106  
Dental Air Compressor Assembly / 14.109  
The Distribution Network / 14.110  
Pipe Materials, Joints, and Installation / 14.110  
Valves / 14.111  
System and Equipment Sizing / 14.116  
General / 14.133  
Codes and Standards / 14.133  
System Components / 14.133  
Required Pressure and Flow Rate / 14.133  
System Design Considerations / 14.134  
General / 14.135  
Acknowledgments / 14.137  
References / 14.137

## **Chapter 15 Vacuum Air Systems**

**15.1**

Definitions and Pressure Measurement / 15.2  
System Components / 15.11  
General / 15.19  
Codes and Standards / 15.19  
Medical-Surgical Vacuum Air Systems Description / 15.20  
System Components / 15.20  
Vacuum Source / 15.20  
Distribution Network Sizing and Arrangement / 15.24

System Sizing /	15.26
Purge and Tests /	15.31
General /	15.32
Methods of Anesthesia Gas Removal /	15.33
System Sizing /	15.34
System Operating Characteristics /	15.35
General /	15.36
Codes and Standards /	15.36
System Components /	15.36
Design Criteria /	15.37
Vacuum Generation /	15.38
Vacuum Source Design Considerations /	15.42
Distribution Network /	15.42
General Design Considerations /	15.43
Codes and Standards /	15.44
Vacuum Source /	15.44
Redundancy /	15.45
Distribution Network /	15.45
Sizing Criteria /	15.47
Types of Systems and Equipment /	15.49
Codes and Standards /	15.49
System Components /	15.49
Detailed System Design /	15.54
Acknowledgments /	15.63
References /	15.63

## **Chapter 16 Animal Facility Piping Systems**

**16.1**

---

General /	16.1
Codes and Standards /	16.1
Animal Drinking Water System /	16.2
Drinking Water Treatment /	16.3
Drinking Water System Components and Selection /	16.5
Animal Rack Manifold Configurations /	16.6
System Sizing Methods /	16.8
Cleaning and Drainage Practices /	16.12
Equipment Washing /	16.18
Equipment Sanitizing /	16.18
Monitoring Systems /	16.18
General Systems Design Considerations /	16.19
Swine Cooling Systems /	16.19
Acknowledgment /	16.21
References /	16.21

## **Chapter 17 Life Safety Systems**

**17.1**

---

General /	17.1
General /	17.2
System Components /	17.2
System Classifications /	17.2
Codes and Standards /	17.2
Types of Drench Equipment /	17.3
Installation Requirements for Drench Equipment /	17.8
Drench Equipment Components /	17.12

Flushing Water Disposal /	17.16
Visibility of Devices /	17.17
System Design /	17.17
General /	17.20
Codes and Standards /	17.20
System Components /	17.20
Types of Systems /	17.20
Types of Personal Respirators /	17.21
Breathing Air Purity /	17.24
System Components /	17.26
Component Selection and Sizing /	17.30
References /	17.34

---

**Chapter 18 Water Display Fountains and Pools****18.1**

General /	18.1
Types of Installations /	18.1
System Components /	18.2
Equipment /	18.2
System Configurations /	18.7

---

**Chapter 19 Nonpotable Water Systems****19.1**

Definitions /	19.2
General /	19.2
Common Uses /	19.2
Codes and Standards /	19.3
System Description /	19.3
System Components /	19.3
Design Flow /	19.4
Treatment Systems /	19.4
Precautions /	19.4
Public Acceptance /	19.6
Typical Installations and Details /	19.7
General /	19.12
Codes and Standards /	19.12
Methods of Preventing Attachment of Organisms /	19.12
Pipeline Cleaning /	19.13
Filters /	19.13
Seawater Intake /	19.14
Piping Materials /	19.15
Equipment Selection and Mechanical Room Design Considerations /	19.16
References /	19.16

---

**Chapter 20 Drinking Water Systems****20.1**

Codes and Standards /	20.1
System Components /	20.2
Drinking Fountain Installation /	20.3
System Design /	20.4
Pipe and Insulation Sizing and Selection /	20.5
System and Component Sizing /	20.5

References / 20.10  
Acknowledgments / 20.10

---

**Chapter 21 Heat Exchangers****21.1**

Introduction / 21.1  
Codes and Standards / 21.1  
ASTM B-31.9, Code for Pressure Piping, ASHRAE B-90.1, Conservation of Energy  
Definitions / 21.2  
General Heat Exchanger Types / 21.3  
Choosing Off-the-Shelf Shell and Tube Exchangers / 21.9  
Plate Type Heat Exchangers / 21.10  
Plate and Frame Heat Exchangers / 21.10  
Immersion Heat Exchangers / 21.14  
Air-Cooled Exchangers / 21.14  
Heat Exchanger Selection / 21.15  
Shell and Tube Heat Exchangers / 21.17  
Sizing Pressure and Temperature Relief Valve / 21.19  
References / 21.20

---

**Chapter 22 Measurement Instrumentation and Methods****22.1**

Introduction / 22.1  
General / 22.1  
Codes and Standards / 22.2  
Definitions / 22.2  
Newtonian Fluids / 22.3  
Sensors / 22.3  
Hydraulic Radius / 22.3  
Flowmeter Classification / 22.4  
Principles of Flowmeter Operation / 22.5  
Electronic (Electromagnetic) Flowmeters / 22.18  
Flowmeter Selection / 22.21  
General / 22.23  
Level Technologies / 22.23  
Level Measurement Selection / 22.33  
Liquid Expansion Thermometers / 22.35  
Bimetallic Devices / 22.25  
Change of State Sensors / 22.35  
Silicon Diode / 22.36  
Infrared Sensors / 22.36  
Thermocouples / 22.36  
Resistive Temperature Devices / 22.37  
Manometer / 22.38  
Bourdon Gauge / 22.38  
Diaphragm Gauges / 22.39  
Capacitance Meters / 22.39  
Strain Gauges / 22.39  
Introduction / 22.43  
Metering Pump Description / 22.43  
Metering Pump Considerations / 22.47  
Calculating the Hydraulic Radius of an Open Channel / 22.50  
Calculating the Flow of an Open Channel / 22.50  
Meters for Measuring Flowrate in Open Channels / 22.51  
Miscellaneous Devices and Measurement Methods / 22.58  
References / 22.60

<b>Appendix A</b>	<b>Pipe Distribution Systems</b>	<b>A.1</b>
<hr/>		
<b>Appendix B</b>	<b>Trade Associations</b>	<b>B.1</b>
<hr/>		
<b>Appendix C</b>	<b>Glossary and Abbreviations</b>	<b>C.1</b>
<hr/>		
<b>Appendix D</b>	<b>Metric Unit Conventions and Conversions</b>	<b>D.1</b>
<hr/>		
<b>Index</b>	<b>I.1</b>
